

# Flying Arc Paper Airplane

## A Cut a Rectangle

This template is 4.25 inches x 5.5 inches, one quarter of a standard letter sized sheet of paper.

## B Create the Wing

- 1 Fold a corner to the midpoint of the long edge.
- 2 Fold along the same edge to the midpoint.
- 3 Fold in the same direction **from** the midpoint.
- 4 Roll corners on the folded edge together, so the folded edge has a curve.

## C Make the Stabilizers

- 5 Fold the corners up on the unfolded edge
